French

Joseph Okutoyi Kinyuru
Software Engineer

I am a motivated junior software engineer with a year of hands-on coding experience. Excited about leveraging my skills to craft innovative solutions for diverse challenges in the software realm. Eager to contribute and grow within a dynamic team environment.

Projects

2023
Project Lead
Cooking Confessions

Cooking Confessions is the first website I made independently. It's a site that allows users to view recipes for foods and cocktails from a wide variety of cuisines. You can also leave comments on recipes that you enjoyed. It was developed using vanilla javascript and a static JSON server.

2023
Project Lead
Story Circle

Story Circle is an app that enables users to connect and interact with others who enjoy reading books. You can form an interactive book club within an app with multiple members and its own clipboard and chat group. It was developed using React Vite and Flask frameworks.

2023
Backend Developer
Parcelpal

ParcelPal is an app that allows users to send a package from one location to another and track it in real-time. It is still under development. Its app stack is React Vite (Typescript), Django, and PostgreSQL.... more tools will be added to this stack due to its heavy demands for real-time connections/ live updates.
